

Organic Amendments

Salute WSP

Turfgrass Conditioner with Potassium Silicate

Salute™ WSP is a unique, dry blend of natural humic substances, seaweed extract, potassium silicate, plant saponins, carbohydrates, sucrose, amino acids and beneficial bacteria in pre-measured water soluble packets.

Salute™ WSP is designed for use in spray programs to increase wear tolerance, to enhance ball roll, to facilitate uniform cutting of turfgrass, to reduce stress and stimulate root growth through enhanced water and nutrient uptake, and to promote recovery and healing.

Salute™ WSP is tank-mix compatible with most pesticides, fertilizers and micronutrients. Its near-neutral pH ensures shelf life stability and ease of mixing and application. Strong acid or highly alkaline tank mixes should be checked for compatibility. Fill the spray tank approximately ½ full with the required water volume. Begin agitation and place the required number of water-soluble packets directly into the spray tank. The water-soluble packets will begin dissolving and the ingredients will go into solution immediately.

NATURE'S WONDER

Nature's Wonder offers APEX-10, the proprietary organic formula that helps plants grow faster, stronger – making them more resistant to loss.

APEX-10 **grows root, grows leaf, and grows soil biomass.** Professional turf maintenance companies, golf course superintendents, landscape installers, tree and shrub growers, nursery centers and vegetable and commodity crop farmers all benefit from the power of nature delivered by APEX-10.

APEX-10 is a natural, organic, proprietary formulation that is derived from highly humified peat sources. This revolutionary organic material is listed for use in organic production and operations by the Organic Materials Review Institute (OMRI) to standards set forth by the USDA National Organic Program.

* **NOTE:** 55 GAL DRUM FOB VA.

Safe & Simple Pre-Emergence Weed Control

100% organic, Safe 'N Simple® Pre-emergence Weed Control 9-0-0 is an all-natural plant product made from Corn Gluten, a dried protein separated from corn during the manufacture of starch in the food industry. In 1985, while studying its value as a fertilizer, researchers at Iowa State University discovered that Corn Gluten contains a natural organic compound which inhibits root development in seedlings. Germination occurs, but seedlings die from lack of a root system. The result is an environmentally safe, non-toxic, completely natural weed control.

SAFE & SIMPLE IS A MINIMUM RISK PESTICIDE EXEMPT FROM ALL DEP POSTING AND APPLICATION REGULATIONS
SAFE FOR USE AROUND SCHOOLS & PLAYGROUNDS

Preemergence Weed Control 9-0-0

- 100% organic
- Made from corn gluten meal
- Controls crabgrass and dandelions and supplies nitrogen
- For use on established lawns
- 50 lbs. covers 2,500 sq. ft.

Monrovia Organic Fertilizer & Soil

Each Monrovia Soil and Organic Fertilizer contains 12 strains of endo and ecto mycorrhizae. Mycorrhizae are fungi that form a symbiotic relationship with plant roots. They provide a bi-directional transfer of nutrients to the plant root--carbon to the fungus. In nutrient-poor or moisture-deficient soils, nutrients taken up by the mycorrhizae can lead to improved plant growth. As a result, mycorrhizal plants are better able to tolerate the vagaries of Mother Nature better than are non-mycorrhizal plants. Since these plants are more efficient, they grow better and bigger and can have better yields as well. This is the same exclusive blend that is used to grow Monrovia's award-winning plants. These fungi increase the surface absorbing area of roots 10 to 100 times thereby greatly improving the ability of the plants to utilize the soil resource. Mycorrhizal plants use less water--up to 30% less, because they are more efficient. They are also more likely to be drought and salt tolerant.

Tree and Shrub Food

Long-lasting, slow release fertilizer that is made from 100% natural and organic ingredients. Ideal for planting all types of trees and shrubs. Contains: Feather Meal, Blood Meal, Bone Meal, Sulfate of Potash and Kelp Meal. Also includes 12 different strains of mycorrhizae. Available in : 4 lb. bags & 15 lb. Bags

Starter Fertilizer

Long-lasting, slow release fertilizer that is made from 100% natural and organic ingredients. A gentle organic fertilizer formulated for all types of transplanting. Contains: Feather Meal, Blood Meal, Bone Meal, Sulfate of Potash, Kelp Meal and Alfalfa Meal. Also includes 12 different strains of mycorrhizae. Available in : 4 lb. Bags

All-Purpose Plant Food

Long-lasting, slow release fertilizer that is made from 100% natural and organic ingredients. Blended for all types of outdoor plantings. Contains: Feather Meal, Blood Meal, Bone Meal, Sulfate of Potash, Kelp Meal and Alfalfa Meal. Also includes 12 different strains of mycorrhizae. Available in : 4 lb. bags 15 lb. bags 40 lb. Bags

Flower and Rose Food

Long-lasting, slow release fertilizer that is made from 100% natural and organic ingredients. Formulated for all types of annuals, perennials and roses. Contains: Feather Meal, Blood Meal, Bone Meal, Sulfate of Potash, Kelp Meal and Alfalfa Meal. Also includes 12 different strains of mycorrhizae. Available in : 4 lb. bags

Monrovia Custom Soil Blend

This is the soil formula that Monrovia Growers uses to grow it's container plants. Includes Peat Moss, Composted Bark and Compost. Same product as in 2007 with updated package. Our Custom Soil Blend contains 12 different strains of mycorrhizae, the same exclusive blend that Monrovia Growers use in their soil mix. Contains a coated fertilizer for season-long results. Ideal for all outdoor container growing.

Monrovia Soil Amendment

Made from Compost, Composted Bark and Sphagnum Peat Moss Same product as in 2007 with updated package. Our Soil Amendment contains 12 different strains of mycorrhizae, the same exclusive blend that Monrovia Growers use in their soil mix. Contains a coated fertilizer for season-long results. Ideal for all outdoor gardening.

Monrovia Organics Potting Soil

Made from Peat Moss, Composted Bark, Perlite and Compost Our Potting Soil contains 12 different strains of mycorrhizae, the same exclusive blend that Monrovia Growers use in their soil mix. Also contains a fast-acting organic fertilizer to help plants get off to a healthy start Ideal for indoor and outdoor container growing.

Monrovia Organics Planting Compost

Made from Compost, Composted Bark and Sphagnum Peat Moss. Our Planting Compost contains 12 different strains of mycorrhizae, the same exclusive blend that Monrovia Growers use in their soil mix. Also contains a fast-acting organic fertilizer to help plants get off to a healthy start. Blended for amending all types of garden soils.

Organic Turf Fertilizer

PLANTTECH
When only the best will do!

TurfStarr 100™
8-0-4 Natural/Organic

PlanTTEch™ 8-0-4 is a combination feather meal, meat and bone meal and mined potash granular fertilizer chelated with Hydrolyzed Microbial Protein (HMP), or lipo-protein. Lipo-protein is new technology developed exclusively by PlanTTEch™ for the green industry. Extremely rich in amino acids, the HMP has the unique capacity to mobilize essential mineral nutrients, increasing their availability and promoting efficient root uptake. It also contains polysaccharides adesigned to maximize soil microbial activity in conjunction with the lipo-protein. Pure humate has also been added to further help with the mobilization of nutrients into the turf. PlanTTEch™ is an efficient 100% organic fertilizer that is now available for all turf types.

50 lb. 8-0-4 PK40/Pallet SGN/200 Coverage -5,000-7,000 sq. ft. Designed for professional turf applications.
