

Old world craftsmanship. . .today's technology®

CAST Lighting Manufactures state-of-the-art Landscape Lighting Fixtures, Transformers and complete Landscape Lighting System Components. Our fixtures are hand-crafted sand-cast solid bronze at a price comparable to aluminum landscape lighting fixtures. CAST Lighting's low voltage transformers have a host of innovative features and CAST No-Ox marine grade wire is tin-coated to prevent corrosion.

We stock the complete line of CAST Landscape Lighting Products !!

Wall Illumination: Hardscape walls come to life in the evening hours with Integral Lighting. Whether your wall is free form or geometric, the wall design is enhanced when lighting is added to the installation. Barely noticeable by day, it is the most discrete fixture on the market. At night, a generous eight foot diameter of light is cast upon your surrounding surfaces.

Technical Information: Integral Lighting provides effective, discreet illumination to any hardscape installation. Beyond safety and security, the addition of lighting to your project extends the useful time of your outdoor living area. Integral Lighting is designed specifically for use with stone, not for use on wood decks. Compatible with existing 12v systems, long life 10w Xenon bulb and 6' leads for connection included.

Tread And Step Lighting For Safety: Integral Lighting is the only manufacturer of a fixture designed specifically to fit the typical tread and riser relationship of hardscapes. Our fixture illuminates most step applications for safety and security without costly installation techniques. The fixture is rugged, manufactured with heavy-duty non-corrosive components for years of service.
