

Tree & Shrub Planting Accessories

TREGATOR

TREGATOR technology allows 20 or 50 gallons of water to be delivered to the roots of the tree without run-off or evaporation reducing watering frequency and saving valuable man hours.

TREGATOR is very simple to use. Just zip TREGATOR around the tree trunk and fill through the opening at the top. Water trickles from holes that surround the bottom. When the TREGATOR is empty, unzip and re-fold, leave it at the tree until the next watering, or zip it around another tree and refill.

TREGATOR can fit up to a 12" caliper tree. On 1 - 3 inch caliper trees, a single TREGATOR should be used. On 4 inch caliper trees or larger, two or 3 TREGATORS zipped together around the trunk should be used.

TREGATOR has adjustable water flow rates (from 1 to 16 hours), adjusted (before filling) by opening and closing drainage holes around the bottom.

TREGATOR JR.

14 Gallon Low Profile Drip Irrigation System

Professionally Irrigate Any Low Branched Tree or Shrub Effectively and Efficiently

4-6 hour drip time Fits up to 4" diameter trunk
 Holds 14 gallons of water Reduces watering frequency by 50%
 Significantly reduces transplant shock

TREGATOR Drip Irrigation Specifications.

CATEGORY	ITEM	UNIT OF MEASURE
Volume of Water (When Full)	1 Tregator	20 gallons (approx.)
	2 Tregators	50 gallons (approx.)
	3 Tregators	75 gallons (approx.)
Recommendations for Planting	1 Tregator	1"-3" caliper tree
	2 Tregators	3"-12" caliper tree
Leak Time (Approximate)	1 Tregator	10 - 16 Hours
	2 Tregators	
	2 Holes Open	6 - 10 Hours
	4 Holes Open	
	3 Holes Open	2 - 6 Hours
8 Holes Open		

Steps in Using TREGATOR

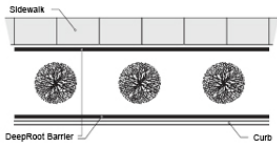

- Before filling, choose the number of leak points to set leak time.
- Wrap around the tree trunk and zip up
- Put several gallons of water and lift on loops to expand the bottom surfaces.
- Add liquid fertilizer or rooting hormone (if desire). Finish filling to the desired level.

DeepRoot®

18" Universal Barrier- UB 18-2
 For surround or linear style planting.
 Or

24" Universal Barrier- UB 24-2
 For surround or linear style planting.

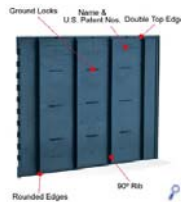

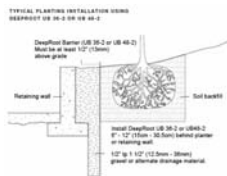

DeepRoot® Universal Barriers are scientifically designed to prevent tree roots from damaging surrounding hardscapes and landscapes.

The UB 24-2 is used for either surround or linear applications with trees that will reach as much as 24" trunk caliper at maturity. Commonly used in conjunction with curb and gutter, parkways and other street tree applications the two foot long panels are 24 inches high and feature our new integrated Zipper joining system that provides for instant assembly, without the use of a joiner strip.

DeepRoot UB 18-2 is used for either surround or linear style planting of trees that will reach as much as 18" trunk caliper at maturity.

Widely used in street tree applications the two foot long panels are 18 inches high and assemble in seconds with the included easy to install joiner strips.

Manufactured using 50% post-consumer recycled plastic these barriers are made of durable and flexible polypropylene with added ultraviolet inhibitors. DeepRoot Universal Barriers have a newly redesigned double top edge that adds durability, improved appearance, safety and additional protection from root overgrowth. They are ideal for protection from invasive tree roots in sidewalk, driveway, patio, and many other applications

Arbor Tie

Better than traditional methods such as wire and hose, ArborTie is safe, soft, easy to use and less expensive than traditional tree ties. The soft polypropylene materials have an exclusive weave that ensures a rounded edge at all times. This prevents the material from ever cutting into the bark of the tree, which is a common cause of injury or death to young trees. The weave also prevents ArborTie from unraveling like rope or string. Girdling is eliminated while improving safety and strength.
