Pesticide Posting Flags

Flags are helping companies meet pesticide posting regulations. The 4" x 5" flag is mounted on an 18" PVC plastic safety staff. Banner style flags are shipped straight. You bend the staff at a 90° angle at installation so flag hangs for clear visibility and readability.

Silt Fence

GENERAL USE: To satisfy environmental erosion considerations during construction, pre-assembled fence controls silt from water run-off.

BENEFITS: Most states require sediment control plans to be submitted before construction can begin. Silt Fence is an alternative to the use of hay bales. Considerably less expensive in material and labor cost. For sediment control.

The Terre Company will continue to offer our very popular Landscape Design Imaging service for 2011, in which we will render a computer generated landscape design for you. All you need to do is bring in your digital camera or a picture of the site. We will then load that picture into our computer software system and layout a landscape image for you to bring back to your customer. Keep your landscape interesting even when the sun goes down with our NEW Night Lighting software. You will receive a well presented personalized package with a color glossy picture. Stop by to check out some of our work. It's a sure win on selling a job! Call and ask for Steve for rates on our Image Rendering Service
