

Welcome to PREMIER TECH BIOTECHNOLOGIES, the home of MYKE®, the all-natural product line that provides amazing results and meets the specific needs of most plants.

PREMIER TECH BIOTECHNOLOGIES has been working on important research and development projects resulting in leading-edge technology. Supported by a team of specialists, PREMIER TECH BIOTECHNOLOGIES has developed ecological products containing mycorrhizal fungi and other natural organisms that improve plant growth and protect human health without harming the environment

WHAT ARE MYCORRHIZAE?

Mycorrhizal fungi have existed since the first plants appeared on dry land more than 450 million years ago. They form a close symbiotic relationship with plant roots. They are called mycorrhizae from the Greek "mukés", meaning fungus, and "rhiza," meaning roots.

Mycorrhizae form a network of filaments that associate with plant roots and draw nutrients from the soil that the root system would not be able to access otherwise. This fungus-plant alliance stimulates plant growth and accelerates root development.

MYKE® PRO products allow landscape professionals to benefit from the advantages of mycorrhizae:

- decrease in plant losses (reduce maintenance costs)
- ensure faster establishment
- result in vigorous and healthy plants
- reduce watering needs

REDUCE YOUR OPERATION COST

for better plant survival

THE MYKE PRO LANDSCAPE PROGRAM
Offers financial support for the professional landscaper for up to 2 years on the replacement of dead plants in projects where MYKE PRO LANDSCAPE was used

Code	Description	
PM MPL1	MYKE PRO Landscape	1.4 QT.
PM MPL2	MYKE PRO Landscape	10.9 QT.
