TERRE LAWN AND GARDEN PRODUCTS

OFFERS:

- A FULL 40% PROFIT, PLUS ADDED PROFITS FOR VOLUME
- FORMULAS ADAPTED TO YOUR AREA
- A 2% ADVERTISING ALLOWANCE
- SPEEDY DELIVERIES

ADVERTISING:

An advertising allowance will be given for your use in local newspapers. This allowance will be 2% of your total purchases of all items from THE TERRE COMPANY (exclusive of nursery stock) from January 1st through June 30th. To receive your allowance, submit a tear sheet of your advertising copy together with your invoice for the same. *THIS ADVERTISING ALLOWANCE MAY ONLY BE USED TOWARDS THAT PORTION OF THE AD DEDICATED TO AT LEAST 2 TERRE BRANDED PRODUCTS & THE TERRE LOGO.*

WARRANTY:

THE TERRE COMPANY warrants that the seed, fertilizers, insecticides and herbicides sold as described on the container are within recognized tolerances, but gives no warranty, expressed or implied, as to the performance of these products - whether used according to directions or not. The buyer assumes all risks.

CLAIMS:

Claims for damaged merchandise or shortages should be made as soon as possible after delivery.

TERMS OF PAYMENT:

- Customers with approved credit, **Net 30 Days**.
- A minimum purchase of **\$100** is required to charge on all established credit accounts.
- All other sales are **C.O.D.**
- Accounts unpaid after **30** days from date of delivery will be charged **1½%** per month interest.
- Prices listed in this catalog are subject to change without prior notification.
- A \$75 handling fee will be assessed for all returned checks.
- Visa, Amex, MasterCard and Discover accepted.
- All personal and company checks that cannot be verified must be backed up by Visa or MasterCard impressions.

TERRE CO. POLICIES:

SALE OF RESTRICTED USE PESTICIDES: We are required by law to maintain copies of your Current pesticide applicator's permit on file to sell you restricted use pesticides.

ORDER PLACEMENT: Available 24 hours a day! During regular business hours or after hours leave your order on our fax machine: (973) 473-4402 or email to sales@terrecompany.com

PICK-UP: We maintain an efficient pick-up department enabling our customers to satisfy their needs in a hurry!

FED EX: Is often the fastest and least expensive way to handle small orders. Delivery and handling charges will be added to your invoice.

DIRECT SHIPMENTS:

For even greater savings, see if you qualify for direct shipment from one of the many fine growers we represent in container and field grown Nursery stock. We can now offer you most of the material in this list on a direct ship basis.

GUARANTEE:

We give no guarantee, expressed or implied, as to life, description, quality, or any other matter concerning our Nursery Stock. Acceptance of our Nursery Stock at the time of the sale is considered to be proof that you are satisfied with the health and survivability of these plants. **WE WILL NOT REPLACE OR GIVE REFUNDS FOR ANY REASON ON NURSERY STOCK ONCE IT HAS LEFT OUR YARD. NO EXCEPTIONS!!**

CUSTOMER PICK-UP INFORMATION:

Since we only sell to the wholesale trade, our yard prices are posted. We do this to make it more convenient for you, our customer, without confusing you with some kind of a coding scheme. Because of this, and for insurance reasons, we do not encourage you to bring your customers to the nursery yard. Pick ups can only be made by you and your authorized employees.

TAGGED MATERIAL:

We will be pleased to hold any nursery stock tagged by you for up to one week, provided that it is paid for when tagged. Any goods left longer than one week are not our responsibility and we will not issue refunds in the event of loss or damage.

BUSINESS HOURS:

Regular Business Hours are Monday - Friday 7:00 am – 5:00 pm

We are Open Saturdays until Noon in the Spring and Summer

Close for the Following Holidays New Years Day, Presidents Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, Day after Thanksgiving, Christmas Day

Growth Products offers technologically advanced liquid fertilizers, chelated micronutrients, biological fungicides with beneficial microbes, natural liquid organics, our proprietary Smart Nitrogen®, and a chorus of other products to make you and your turf top-flight.

As a golf course professional, you demand superior results on every tee, every green, and every fairway.

The Classic 18-0-6 + Micros

Liquid Fertilizer Solution with 50% SRN Plus Micronutrients

Growth Products' **The Classic 18-0-6** is a professional liquid fertilizer for golf course tees and greens. Made from the highest quality N & K raw materials and micronutrients, Classic 18-0-6 provides golf course professionals with outstanding results and pin-point control.

Starter Plus 8-32-5

Liquid Fertilizer Solution with 50% Slow Release Nitrogen

Nitro-30 SRN (30-0-0)

Known as the *Smart Nitrogen™*, is the smart choice for turfgrass professionals. A clear liquid, **Nitro-30** is safe, easy-to-handle, and provides superior agronomic results. **Nitro-30** provides rapid correction of nitrogen deficiencies and gives steady, even feeding without harmful surge growth.

Nitro+K 22-0-16

82% Slow Release Nitrogen with Potassium Carbonate

TKO" Phosphite 0-0-26

"TKO" **Phosphite 0-0-26** is a concentrated P/K solution that's highly beneficial to all types of golf and lawn turf and is also used extensively in the agricultural and horticultural industries.

Iron Max AC 6% 15-0-0

With **2% Chelated Manganese and 3.5% Sulfur** Iron Max 6% is a chelated iron and manganese chelate that promotes fast green up. Iron max 6% provides the plant with immediately available iron / manganese along with nitrogen for the correction of iron chlorosis.

X-Xtra Iron 10%

X-Xtra Iron 6-0-0 contains more iron than the closest competitive product on the market. **X-Xtra Iron** provides 100% soluble, chelated iron in an immediately available form for both foliar and root applications. With its low nitrogen to iron ratio, **X-Xtra Iron** provides rapid green-up without any harmful surge growth. It's a difference you can see in just 24 hours!

Essential® Plus 1-0-1

100% Natural Organic Soil Amendment and Root Stimulator with 21 L-Amino Acids

Essential® Plus is a 100% organic liquid that works both as an amendment for soils and as a safe, effective root stimulant for all turf types.

Companion® Liquid Biological Fungicide

Prevents, controls and suppresses a broad range of turf diseases including Anthracnose, Brown Patch, Dollar Spot, Summer Patch, Fusarium Patch, Pythium and Phytophthora. One of Growth Products' most innovative products, **Companion®** was the first-ever EPA registered biofungicide on the U.S. market.

As a turf professional, you demand nothing less than perfection, whether you are a sports turf manager working on athletic fields or racing tracks, or a sod grower.

Repair Plus™ 3-0-3 Grow in Seed Faster, Mend Divots, and Restore Damaged Turf

Granular product that fixes divot damage and speeds turf repair in bare spots in minimal time, with minimal effort. Easily mixed with sand or other soil media, **Repair Plus™** is recommended for top-dressing or when overseeding.

Why Foliar Nutrition Makes Sense

The concept that the "non-root" parts of plants take up nutrients from nutrient sprays and other applications has been shown over a long period of time by many researchers using radioactive isotopes on all nutrients to follow their entry into the plant and translocation throughout the plant.

All Grigg's products contain a series of selected natural organic compounds, "Organic-facilitators," which chelate or complex nutrients and keep them in functional form until the plant utilizes them.

Gary's Green 18-3-4 + Iron Designed to be foliar applied and completely absorbed while it is drying on the target plant. Gary's Green will give you a quick visual response: the chelating and complexing agents it contains are rapidly absorbed into the plant tissue to provide a rapid and sustained green-up.

Tuff-Turf 1-0-14 + Ca + Micros + Si Tuff-Turf contains high levels of quickly available potassium enhancing resistance to abiotic stress. Tuff-Turf contains silicon, a beneficial element for grasses, increasing cell wall strength and blade rigidity. Environmentally friendly, the organic base in Tuff-Turf is used as a food source by both plants and microorganisms. Acidic pH at 4.0.

Sili-Kal-B 8-0-4 + Ca + Si + B Sili-Kal-B is a unique combo product that includes calcium, boron, potassium and nitrogen as well as organic facilitators including plant based amino acids, organic acids and complex polysaccharides to insure optimum absorption and availability. Properly chelated Calcium can be absorbed through leaf tissue.

Ultra-Plex 5-0-3 + 2% Fe + Micros Ultra-Plex is organic based and contains 15 recognized biostimulants. Contains an effective non-ionic organic surfactant. Fast response, typically 1-3 hours. Enhances response of fertilizers.

LM FT-ANINS3	Insecticide III DG Pro	54	50.15	45.14

Governor 5-0-10 SGN 75 32lb. bag covers 6,300sf. At the medium rate.

- Contains the same active ingredient as Primo Maxx.
- Reduces turf grass clippings by 50%.
- Ideal for hard to reach mowing areas.
- Reduces watering requirements.
- Reduces expenses for mowing labor and equipment maintenance.
- Allows longer interval between cuttings.
- Redirects grass growth energy into roots and shoots improving turf density, durability and color

While supplies last

18-0-18 Turf Fertilizer with DG ProContec

SGN 75 60% MUTEch / Fe/ Mn 40lb. bag covers 7,200sf. @ 1lb N per 1,000sf.

- Contec high performance methylene urea technology for controlled even nutrient release.
- Homogenous greens grade particle.
- High rate of potash from potassium sulfate.
- DG Pro dissolves quickly into turf canopy when irrigated, improving playability.
- Will not burn when used as directed

13-0-26 Turf Fertilizer with DG Pro Contec

SGN 75 100% MUTEch 40lb. bag covers 10,500sf. @ ½ lb N per 1,000sf

- Proprietary dispersing granule formula.
- Ideal size for greens use.
- Slow release nitrogen from methylene urea.
- Ideal as a starter fertilizer.
- High potassium formula to build turf tolerance.

12-3-12 Turf Fertilizer Greens & Tees DG Pro Contec

SGN 75 50lb. bag covers 9,500sf.to 23,500sqft typical 3.4lbs lbs. per 1,000sf.

Professional Granular Products

Insect Controls

Talstar XTRA Verge (PGTS25) (Bifenthrin)

For control of Armyworms, Cutworms, Sod Webworm: Use 50lbs. per Acre. Annual Bluegrass, Weevil (Hyperodes) (Adult), Billbugs (Adult) Black Turfgrass Ataenius (Adult), Leafhoppers, Mealybugs: Use 50-100lbs. per Acre. Ants, Centipedes, Chinch Bugs, Fleas (Adult), Fleas (Larvae), Imported Fire Ants, Millipedes, Mole Cricket (Adult), Mole Cricket (Nymph) Ticks, Pillbugs, Sowbugs Use 100-200lbs. per Acre.

Dylox Granular (PGDX37)

Control of white grub larvae, such as Japanese beetle. 30lb. bag covers 10,000sf.

Zenith .5G / Merit .5G (PGZN30)

Control of white grub larvae, such as Japanese beetle. Also Controls Billbugs, Black turfgrass ataenius and Hyperodes. 30lb bag covers ½ acre.

Fungicides

T-METHYL 2.08% (PG36HJ)

T-METHYL is a broad spectrum fungicide exhibiting preventative, curative and systemic properties. It is useful on a wide variety of turf and ornamental disease problems including Dollar spot, Brown patch, Leaf spot, Red thread, Fusarium and more. 30lb. bag covers up to 20,000sf.

Eagle 0.39% (PGEHJ)

Eagle 0.39% Granular Turf Fungicide is a granular product containing systemic, protectant and curative fungicide for the control of listed diseases in established turfgrass. Examples of such sites include, residential and commercial lawns, ornamental turfgrass, grounds or lawns around business and office complexes, golf courses (fairways, roughs, tees, greens) and sod farms. Optimum disease control is achieved when this product is applied to established turfgrass in a regularly scheduled preventative program. Eagle 0.39 Granular Turf Fungicide covers approximately 7,500 sq ft at the application rate of 4 lb per 1000 sq ft

Weed Controls

Snapshot DG (PGSNAP)

Pre-emergent herbicide for control of annual grasses and broadleaf weeds on ornamentals, trees and nursery stock. Use 100-200lbs per acre.

Treflan .5G (PGTR40)

Pre-emergent herbicide for control of annual grasses and broadleaf weeds on ornamentals, trees and nursery stock. Use 80lbs per acre.

7-0-0 + Dimension (TC0550)

A small amount of nitrogen used as a carrier for the best crabgrass preventer available. Dimension provides a wide window of application. 50lb. bag covers 20,000sf.

HERBICIDES

Acclaim LM FT-PWACC1 4x1 Gal
LM FT-PWACPT 12x1 Pt

Selective grassy weed herbicide to control crabgrass, goosegrass, barnyard grass, foxtail and johnsongrass. Use .34oz. to 1.02oz. per 1,000sf.

Pramitol 25 E LM FT-PWPR01 4x1 Gal

For weed control on industrial sites where complete control of vegetation is desired for a year or more. Use 5-7 ½ gallons per acre or 1-1 ½ pints per 1000sf.

Q4Plus LM FT-PWQ401 4x1 Gal

For the suppression of yellow nutsedge, control of certain grassy weeds, such as crabgrass and foxtail, and control of most troublesome broadleaf weeds in established cool-season turf areas. Use 2.6 – 3oz. per 1000sf.

RoundUp ProMax LM FT-PWRUPM 2x 1.6 gal
RoundUp DryPak LM FT-PWRUDP 6x5 x 1½ oz
RoundUp QuickPro LM FT-PWRUQ6 4x6.8lb

Total vegetation control, neutralized by soil.

Safe to use adjacent to domestic water supplies. Spray until foliage is wet. Re-seed after seven days. For dry packs use one pack per gallon.

ProSedge LM-FTPWMANG 30x.9gr
ProSedge LM FT-PWMAN1 1.1/3oz

Nutsedge control. For post-emergence control of purple or yellow nutsedge found in established turfgrass, Use 2/3 to 1 1/3 ounces by weight per acre. Use lower rate for light infestations. Use nine grams of Sedgehammer in one or two gallons of water per 1000sf.

Specticle Total LM FT-PWSP44 4X144oz

Non-selective control of emerged and pre-emerged grasses and broadleafweeds in Non-Crop Areas, Dual Action FORMULA Kills EXISTING WEEDS & GRASSES PLUS Prevents New Weeds & GRASSES for up to 6 Months. Rainproof in 30 minutes. Use 16oz per gal to cover 1000sqft

Tenacity LM FT- PWTEN8 12x8oz

With its proprietary active ingredient, mesotrione, Tenacity herbicide can be used both as a pre-emergence and post-emergence herbicide to selectively control 46 weeds and grass species, including creeping bentgrass in Kentucky bluegrass, perennial ryegrass, or fine and tall fescue. This systemic herbicide is safe to use on established or newly seeded turf.

Triplet SF LM FT-PWTRP1 5x1 Gal

Triplet SF is perfect for control of hard-to-kill broadleaf weeds, such as dandelion, clover, henbit, and plantains in turfgrasses.

Triamine LM FT-PWPAR3 2x2 ½ Gal

Controls a wide spectrum of broadleaf weeds efficiently. A 2,4-D, MCP, Dichlorprop formulation.

Use 3 -4 pts. per acre or 5 - 7 teaspoons per gallon for 1000sf.

Organic Herbicides

“NO POSTING NECESSARY”

BURNOUT II

Made of clove oil, plus other food grade ingredients, this product works faster than harsh chemicals. You'll see amazing results in three hours and dead weeds and grass by morning. A second shot takes out unwanted plants right down to their roots. Yet, this material won't harm the environment, animals or people. For non-selective control of herbaceous broadleaf and grassy weeds. These weeds include: Chickweed, Black Medic, Dandelion, Pigweed, Algae and Moss, Foxtail, Ivy Leaf, Morning Glory, Poison Hemlock, Milkweed, Liverwort, Ragweed, Clover, Sickelpod, Quackgrass, and Bluegrass.

2 ½ Gallon concentrate treats 3000-4500sf.

Burnout II Is A Minimum Risk Pesticide Exempt From All Dep Posting And Application Regulations, Safe For Use Around Schools & Playgrounds

Code	Description	Cost
PWBO41	Burnout II 4X1 Gal Case	\$200.00
PWBO25	Burnout II 2x2 ½ Gal Case	\$225.00

FUNGICIDES

Eagle 20 EW LM FT-PSEGL4 4x1 Gal

Controls dollar spot, brown patch, leaf spot.

Rates from .6oz. per 1000sf. 1 case covers 80,000sf

MISCELLANEOUS

Triple Crown T&O LM FT-PITC01 4x1 Gal

Triple Crown is the singular solution that combines fast knockdown, lasting residual and broad spectrum pest control with multiple modes of action. By eliminating the need to tank mix multiple products to control above- and below-ground pests, Triple Crown helps save time, money and shelf space. Apply .23-.80 fl oz. per 1,000 sf.

Dam Oil LM FT-PISC05 2x2 ½ Gal

Dormant and foliar oil spray for fruit and shade trees, ornamentals and evergreens. For most scale when temperatures are above 40°: Use 1:50 dilution.

Nu-Film P LM FT-PMNUP1 4x1 Gal

A spreader sticker for use with all pesticides to increase the efficiency of sprays. Use 4-6 oz. for 100 gallons of spray

Vapor Gard LM FT-PMVG01 4x1 Gal

An anti-transpirant for use on plants to retard water loss & maintain healthy foliage. Use 1 part Vapor Gard to 20 parts water.

Soil Moist Plus

Soil Moist Plus 7-7-7 is a synthetic acrylic water storing polymer blended with an 8-9 month timed release 7-7-7 fertilizer. It is a safe, non-toxic polymer used in all horticultural and landscape applications. When used according to the application rates, SOIL MOIST PLUS 7-7-7 will reduce irrigation frequency by 50% and last 3-5 years in the soil. The fertilizer is effective in the soil for 8-9 months at 70°F.

Soil Moist Plus 7-7-7 polymers are not multi-use polymers that were developed for other industries. Soil Moist Plus 7-7-7 are potassium based and specifically designed for the horticultural and landscape industry.

- Reduces plant watering by 50%
- Reduces plant stress due to lack of available water
- Feeds a timed release fertilizer for 8-9 months
- Increases soil aeration
- Reduces transplanting shock
- Cost effective

Hart Seeds

THE CHAS. C. HART SEED CO.
PACKAGED FLOWER & VEGETABLE SEEDS

Everyone loves Hart's seeds! These beautiful display racks let you create a one-stop seed center which will provide you with **floor traffic and profits**. With the Hart's sale & return program, there is **no cash outlay**. The famous Hart's name and **low price guarantee** your sales! **There is a Hart's Seed Rack to Fit Every Need.**

Seed Establishment Mulches

Seed Aide® CoverGrow™ Spread or Spray Mulching Granules

Profile® CoverGrow™ is an advanced technology pellet made from recycled wood and cellulose fibers. Once applied and activated by water, the pellets quickly expand and disperse to provide outstanding protection and water-holding performance right where it's needed—whether you're spot treating smaller bare spots, or hydrospraying larger areas, CoverGrow is the easy and convenient way to establish vegetation.

Broadcast with Spreader or by Hand

- Increased swelling, dispersion and coverage compared to leading dry applied pellets
- Smoother flowing for easy spreader application
- Stays in place due to advanced tackifier technology

Hydroseeding

- Rapid dispersion and fast mixing in jet-agitated hydroseeders
- Easy application of the smooth shooting, high coverage slurry
- Resists rainfall impact to stay in place longer than competition due to advanced tackifier technology

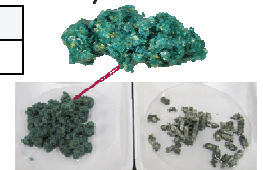

Dry Pellets

CoverGrow Competition
Each sample is 10 grams of dry pellets

Erosion Control

WE KEEP THE EARTH FROM MOVING. Using comparative testing protocol developed over the past 20 years at the Utah Water Research Laboratory (UWRL), Futerra® F4 Netless™ took erosion control effectiveness ratings to unprecedented levels. Percent effectiveness compares erosion amounts of a slope treated with an erosion control device versus the same unprotected slope when subjected to rainfall events under carefully controlled conditions. Slope gradient, slope length, soil type, rainfall event and duration of event are among the parameters most commonly evaluated when comparing erosion control devices. Percent effectiveness is determined by subtracting the soil loss ratio of the treated surface versus an untreated control surface (“C” Factor) from one and multiplying by 100 percent. Tests have documented the superior performance of F4 Netless™ versus other leading erosion control blankets when evaluated under the same conditions.

Through its patented combination of wood fiber and crimped, interlocking man-made fibers, F4 Netless™ absorbs and holds nearly five times its weight in water—creating a moisture reservoir that ensures accelerated germination and growth. F4 Netless™ provides greater slope erosion control effectiveness, increased water absorption and establishes vegetation faster than straw blankets.

Moundmaster Bricks

Maximizing Performance with Minimum Maintenance

The pitcher's mound and home plate areas are the most important pieces of real estate on a baseball diamond. Unfortunately, these areas are often constructed and maintained with inferior materials that breakdown quickly, causing "pot holes" that jeopardize the safety of athletes and reduce the quality of play. **TURFACE MOUNDMASTER** is the highest quality, most durable packing clay available. Pre-formed into easy to use clay blocks,

TURFACE MOUNDMASTER installs quickly and performs superbly. Properly maintained, **MOUNDMASTER** will reduce the labor involved in caring for your pitcher's mound and batter's boxes. It is ideal when renovating or rebuilding mounds and boxes.

Profile Porous Ceramic (PPC) Greens Grade

Greens Grade is an inorganic soil amendment proven on thousands of greens across the country to resist compaction, eliminate localized dry spot, drain better and facilitate healthy root systems that leave turf less prone to disease and other maintenance problems. A kiln-fired porous ceramic from a unique mineral deposit in Mississippi, Greens Grade replaces peat in any sand-based root zone

A Greens Grade particle is 74% pore space with 39% capillary (water) pores and 35% non-capillary (air) pores. Blended with sand, it increases the water and nutrient holding capabilities and the air and drainage pores—permanently improving most soils. The small-sized particle is ideal for sand-based construction and is available in two distinct colors—Natural for use in construction and topdressing, and Emerald to disguise worn areas and blend in with turf.

Code	Description	1-39 Bags	40-199 Bags	200 + Bags
LM GS-ACPR50	(50lb) PPC Greens Grade	21.00	19.95	18.90

TURFACE Reduces Compaction Making Fields Safer

Turf ace Mvp. With its high porosity and strong angular shape fights compaction, keeping infields firm enough for solid footing yet resilient enough for safe, consistent play Turf areas are also greatly affected by compaction. TURFACE MVP's pore space improves the exchange of water and oxygen needed to promote a healthy root system.

Turf ace Pro League is a patented soil conditioner manufactured with smaller, more consistent particles that flow easily into aerification holes. Used as a topdressing, Pro League saves games and turf by preventing slick and muddy conditions that destroy turf and make fields unsafe and unplayable. It provides superior drainage and absorption and delivers the color, safety and performance of a Major League infield.

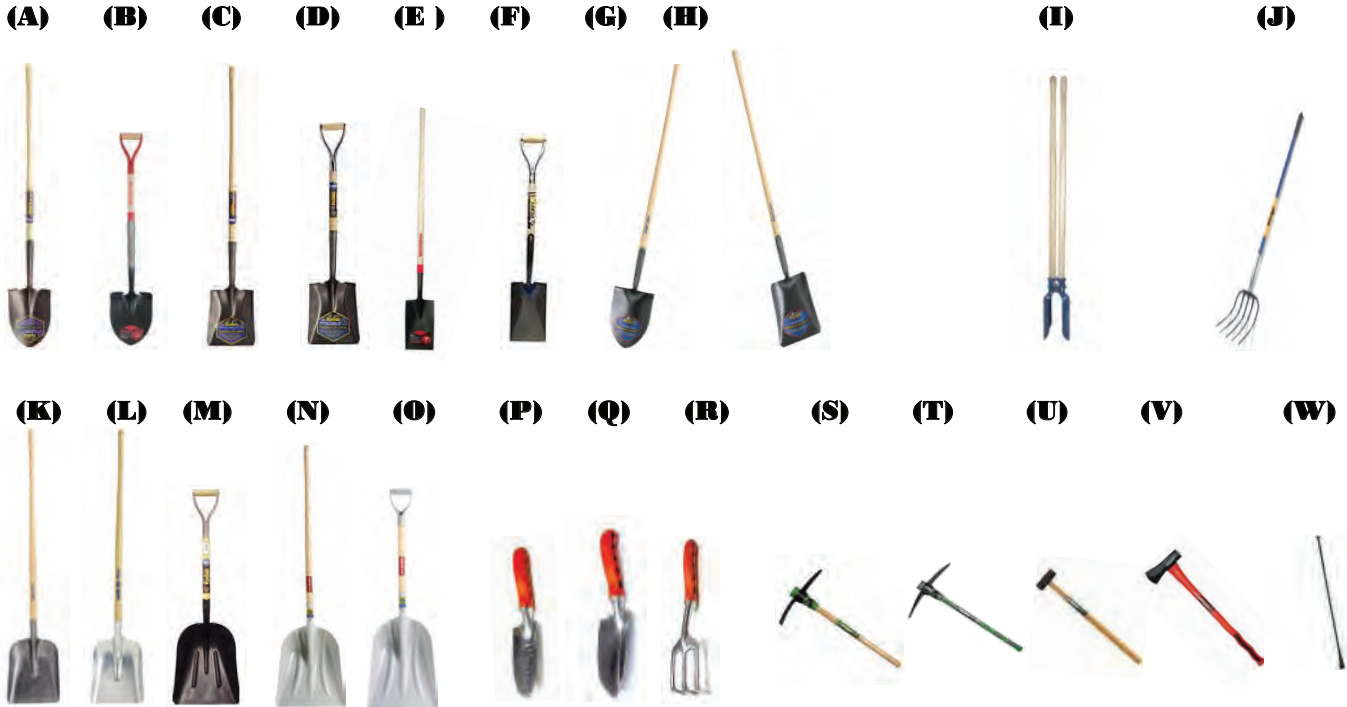

Turf ace Quick Dry is specifically designed to absorb infield puddles and should be used in conjunction with TURFACE MVP. TURFACE Quick Dry is the same high quality calcined clay as TURFACE MVP but sized for greater surface area to eliminate puddles instantly. Like TURFACE MVP, TURFACE Quick Dry also absorbs its weight in water, slowly releasing the moisture. This allows TURFACE Quick Dry to work over and over again as it conditions the infield surface.

Heavy Duty Landscape Tools

WW spades and shovels are made of aircraft-quality steel, are super strong, rust resistant, smooth and the perfect weight. Five year guarantee against breakage under normal use. Large all-tubular "D" handle for comfort. Optional rubber foot pad available. Long tapered cutting edge resists dents and nicks from hard digging conditions. Virtually self-sharpening during use. The innovator of spade technology has developed the ultimate spade.

LANDSCAPE LIGHTING

Old world craftsmanship. . .today's technology®

CAST Lighting Manufactures state-of-the-art Landscape Lighting Fixtures, Transformers and complete Landscape Lighting System Components. Our fixtures are hand-crafted sand-cast solid bronze at a price comparable to aluminum landscape lighting fixtures. CAST Lighting's low voltage transformers have a host of innovative features and CAST No-Ox marine grade wire is tin-coated to prevent corrosion.

From the latest LED systems to traditional incandescent choices, the complete kichler landscape collection helps landscape professionals deliver exactly what the homeowner envision for the home!!

Integral Lighting products provide innovative solutions to hardscape lighting. Designed by Hartman Design Inc, Integral Lighting products are engineered, manufactured and supported in the USA. Though often imitated, our combination of clean design, efficient installation and reliable performance is unrivaled in the industry. Our proven service and support is backed by years of experience and state of the art manufacturing facilities, giving us the ability to provide product and service beyond your expectations

Tru-Scapes Landscape Lighting is developed by two professional landscape design and build companies in Pennsylvania with the mission to create a good quality LED landscape lighting product at an affordable cost to our fellow contractors. Their goal is also to provide a line of products that is simple and focused on the lights that are the most common styles that we install in our projects and not a giant catalog full of options for our clients to get lost in. This allows our distributors to have our full line of products in stock and also give our landscape lighting contractors better availability and easier, more streamlined sales to the customer.

TREEGATOR

TREEGATOR technology allows 15 or 25 gallons of water to be delivered to the roots of the tree without run-off or evaporation reducing watering frequency and saving valuable man hours.

TREEGATOR is very simple to use. Just zip **TREEGATOR** around the tree trunk and fill through the opening at the top. Water trickles from holes that surround the bottom. When the **TREEGATOR** is empty, unzip and refold, leave it at the tree until the next watering, or zip it around another tree and refill.

TREEGATOR can fit up to a 12" caliper tree. On 1 - 3 inch caliper trees, a single **TREEGATOR** should be used. On 4 inch caliper trees or larger, two or 3 **TREEGATORS** zipped together around the trunk should be used.

TREEGATOR continuously waters for approximately 5 to 9 hours, 2 water release points per bag.

TREEGATOR JR.

15 Gallon Low Profile Drip Irrigation System

Professionally Irrigate Any Low Branched Tree or Shrub Effectively and Efficiently

5-8 hour drip time

Holds 15 gallons of water

Significantly reduces transplant shock

Fits up to 4" diameter trunk

Reduces watering frequency by 50%

When Gas Powered tools are not an option

"Treekote" Tree Wound Dressing is an Asphalt based emulsion formulated to protect trees after pruning or accidental damage. When applied to pruned or damaged areas "TreeKote" gives the job a neat, "finished" appearance while helping protect the exposed area from insects and fungi, which can cause disease and decay.

Arbor Tie

Better than traditional methods such as wire and hose, ArborTie is safe, soft, easy to use and less expensive than traditional tree ties.

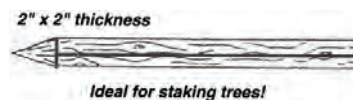

The soft polypropylene materials have an exclusive weave that ensures a rounded edge at all times. This prevents the material from ever cutting into the bark of the tree, which is a common cause of injury or death to young trees. The weave also prevents ArborTie from unraveling like rope or string. Girdling is eliminated while improving safety and strength.

PAVERS & HARDSCAPES

Now that The Terre Company has merged with Extech Building Materials, we have access to a whole new spectrum of products. Along with landscape supplies we now sell and stock pavers, wall block, and everything regarding building materials and hardscapes. We deal with multiple hardscape companies to assure that you and your customers get exactly what they are looking for.

Since 1995, Belgard's locally made and nationally backed products have transformed thousands of residential and commercial properties across North America. Their uncompromising level of quality and craftsmanship sets the standard for hardscapes. And their remarkably natural look and feel is unrivaled in the industry. They strive to improve their products by spending more than 20,000 hours in research and development every year. Perfecting new products keeps them aligned to current design trends and places Belgard on the cutting edge of manufacturing techniques and technologies.

For more than 50 years Nicolock has been trusted to help homeowners in achieving their perfect home. From technological advances such as their paver-shield, to their advanced color blending technique, Nicolock has continued to lead the way in production and supply of quality concrete products

Revolution Stone brings the beauty of natural stone to your modern construction and restoration projects. Whether adding substance and grace to new constructions, or matching the historic imprint of a landmark structure, Revolution Stone's precision cut, natural stone will help you realize your vision. Why compromise your vision with an imitation product, when you can have the genuine article? Revolution Stone Works facility boasts state of the art stone cutting machines from around the world, operated with a passion for our craft with over 120 years of collective stone experience.

Cambridge Pavingstones are changing America's Landscape with Pavingstones and Wallstones! They want towns all over the United States to upgrade their sidewalks, downtown areas and municipalities with products that will outperform concrete and asphalt. They are allowing people to extend their living space beyond their four walls so that they can enjoy time with family and friends throughout the year. This is about something larger than a pretty driveway or patio. It is about an investment that makes people feel good about coming home or taking a walk in their local community. Their mission is to encourage positive change in the environments we utilize each and every day

NOTE:

Use these recommended settings as starting points when calibrating a spreader to achieve the needed application rates. Once equipment is calibrated the technician should make further setting adjustments as necessary, to maintain the proper application rate. Calibrate spreaders regularly to confirm that equipment wear or other factors have not changed the flow rate. Calibration instructions are included in the owner's manual that was provided by the equipment manufacturer at the time of purchase.

Twin Springs Nursery:

Located in the heart of the fertile Willamette Valley of Western Oregon, Twin Springs Nursery is a 275 acre family owned and operated wholesale nursery.

Identifying a need for outstanding nursery stock, Twin Springs Nursery was formed in 1989 with the express goal of providing superior quality nursery stock to the trade and has never lost sight of that original goal. Satisfied customers remain our greatest sales tool and our plants draw those customers back year after year.

Twin Springs Nursery currently grows a broad variety of woody ornamentals. We offer both field grown and container plant material.

W.V. Griffin Nurseries:

Since 1932, W V Griffin Nurseries has been growing and selling Christmas trees to generations of families in New Jersey. At the present South Brunswick location, there are seven varieties of fir, spruce and pine, from four to sixteen feet, waiting to be cut and loaded onto cars heading home for the Christmas season. The perfect tree has been growing in our fields waiting to be chosen by your family. Of course Griffin Nursery also offers all of the trees they grow as live B&B evergreen trees for any landscape project. Their trees available for direct shipments to your location, minimum 40 trees.

Terms and Conditions: Minimums per grower apply; Pricing FOB the grower

Delivery Policy

Free and prompt delivery will be provided on all orders over \$500.00 within our normal delivery areas (except Nursery stock & Christmas, see Nursery delivery policy.)

For orders under \$500.00, a minimum delivery charge of \$50.00 will be added to your invoice unless the order can be shipped Fed Ex. The appropriate Fed-Ex charges plus a handling charge will then be added to your invoice.
